

## Estimate Your Personal Radiation Dose

Radiation is measured in terms of millirems (mrem). The average annual dose per person from all sources is about 360 mrem per year, but it is not uncommon for any of us to receive far more than that in a given year (largely

due to medical procedures we may have had done). International standards allow up to 5000 mrem per year exposure for those who work with and around radioactive material.

Factors	Common sources of radiation	Your annual dose (mrem)																				
<b>Where you live</b>	<b>Cosmic radiation (from outer space)</b> Exposure depends on your elevation. Amounts are in millirems per year. At sea level .....26 mrem      4000–5000 ft .....47 mrem 0–1000 ft .....28      5000–6000 .....52 1000–2000 .....31      6000–7000 .....66 2000–3000 .....35      7000–8000 .....79 3000–4000 .....41      8000–9000 .....96	_____ mrem																				
	<b>Terrestrial (from the ground)</b> If you live in a state that borders the Gulf or Atlantic coasts, add 16 mrem. If you live in the Colorado Plateau (around Denver), add 63 mrem. If you live anywhere else in the continental United States, add 30 mrem.	_____ mrem																				
	<b>House construction</b> If you live in a stone, adobe, brick or concrete building, add 7 mrem.	_____ mrem																				
	<b>Power plants</b> If you live within 50 miles of a nuclear power plant, add 0.009 mrem. If you live within 50 miles of a coal-fired power plant, add 0.03 mrem.	_____ mrem																				
<b>Food, Water, Air</b>	<b>Internal radiation (based on average values)</b> From food (Carbon-14 and Potassium-40) and from water (radon dissolved in water)  From air (radon)	_____ 40 _____ mrem  _____ 200 _____ mrem																				
<b>How you live</b>	<table style="width: 100%; border: none;"> <tr> <td style="width: 60%;">Weapons test fallout (less than 1)</td> <td style="width: 40%; text-align: right;">1 mrem</td> </tr> <tr> <td>Travel by jet plane</td> <td style="text-align: right;">0.5 mrem per hour in the air</td> </tr> <tr> <td>If you have porcelain crowns or false teeth</td> <td style="text-align: right;">0.07 mrem</td> </tr> <tr> <td>If you wear a luminous wristwatch</td> <td style="text-align: right;">0.06 mrem</td> </tr> <tr> <td>If you go through security inspection at airport (each time)</td> <td style="text-align: right;">0.002 mrem</td> </tr> <tr> <td>If you watch TV</td> <td style="text-align: right;">1 mrem</td> </tr> <tr> <td>If you use a video display (computer screen)</td> <td style="text-align: right;">1 mrem</td> </tr> <tr> <td>If you have a smoke detector</td> <td style="text-align: right;">0.008 mrem</td> </tr> <tr> <td>If you use a gas camping lantern</td> <td style="text-align: right;">0.2 mrem</td> </tr> <tr> <td>If you wear a plutonium-powered pacemaker</td> <td style="text-align: right;">100 mrem</td> </tr> </table>	Weapons test fallout (less than 1)	1 mrem	Travel by jet plane	0.5 mrem per hour in the air	If you have porcelain crowns or false teeth	0.07 mrem	If you wear a luminous wristwatch	0.06 mrem	If you go through security inspection at airport (each time)	0.002 mrem	If you watch TV	1 mrem	If you use a video display (computer screen)	1 mrem	If you have a smoke detector	0.008 mrem	If you use a gas camping lantern	0.2 mrem	If you wear a plutonium-powered pacemaker	100 mrem	_____ 1 _____ mrem _____ mrem _____ mrem _____ mrem _____ mrem _____ mrem _____ mrem _____ mrem _____ mrem
Weapons test fallout (less than 1)	1 mrem																					
Travel by jet plane	0.5 mrem per hour in the air																					
If you have porcelain crowns or false teeth	0.07 mrem																					
If you wear a luminous wristwatch	0.06 mrem																					
If you go through security inspection at airport (each time)	0.002 mrem																					
If you watch TV	1 mrem																					
If you use a video display (computer screen)	1 mrem																					
If you have a smoke detector	0.008 mrem																					
If you use a gas camping lantern	0.2 mrem																					
If you wear a plutonium-powered pacemaker	100 mrem																					
<b>Medical Tests</b>	<b>Medical diagnostic tests</b> <i>Number of millirems per procedure</i> X-Rays: Extremity (arm, hand, foot, or leg) .....1    Dental .....1    Chest .....6 Pelvis/hip .....65    Skull/neck .....20    Barium enema .....405 Upper GI .....245 CAT Scan (head and body) .....110 Nuclear Medicine (e.g., thyroid scan) .....14	_____ mrem																				
	<b>Your Estimated Annual Radiation Dose</b>	_____ mrem

## **Article Radioactivity It's Natural**

Directions: Write answers in sentences on a separate sheet of paper

1. Define radiation.
2. List 2 types of radiation necessary for life on this planet.
3. Define radioactivity.
4. Why does nuclear radiation get the name ionizing radiation?
5. Who invented the Geiger counter?
6. List the particles released from the nuclei undergoing radioactive decay.
7. Explain how radiation is different from radioactivity.
8. What makes radioactivity dangerous?
9. Why did Marie Curie win the Nobel Prize?
10. Why was radium popular in the early 20<sup>th</sup> century?
11. What 2 elements were used to make glow in the dark paint?
12. What made people's attitude toward radioactivity change?
13. List 2 places in the home where radioactive elements are found.
14. How does smoke effect a smoke detector?
15. List 5 food sources that contain radioactive potassium.
16. How much greater is a smokers annual exposure to radioactivity than a nonsmoker?
17. What 2 things can increase your exposure to cosmic rays?
18. Why does radon tend to not travel upward?
19. How does carbon-14 get into our bodies?
20. What radioactive element is found in the liver?
